

# Who are we? ● ● ●

## Specific expertise

- ✓ Successful experience in the preparation of European calls
- ✓ Innovative methods and tailored solutions for trial design
- ✓ infectious diseases, immunology, vaccinology, neurodegenerative diseases, nutrition
- ✓ Medical devices
- ✓ Ressource-limited settings

## EUCLID unites existing regional resources with expertise in clinical research and international trials

- ✓ CIC – Clinical Epidemiology, Clinical Investigation Centre
- ✓ INSERM Unit 1219 / ANRS CTU (CMG-EC) – iso 9001:2008
- ✓ Bordeaux Hospital's Clinical Research and Innovation Directorate
- ✓ Bordeaux University Hospital's Unit for Biostatistical and Epidemiological Support (USMR) - iso 9001:2008
- ✓ Biological Resources Centre (CRB) at Bordeaux University Hospital
- ✓ Bordeaux University Department of Pharmacology
- ✓ The institute of Public Health, Epidemiology and Development (ISPED )
- ✓ The Limoges Hospital Clinical Trials Unit (CEBIMER)
- ✓ Clinical Research and Clinical Epidemiology Unit (UREC) of the Bergonié Institute

# 7 good reasons to work with us ● ● ●

- ✓ Strong local scientific environment
- ✓ Successful conduct and coordination of international trials in competitive research area
- ✓ Capacity for tailored solutions for trial design (optimal study designs, innovations)
- ✓ Save time and efforts: robust systems to ensure conduct and delivery of clinical trials at the highest quality standards
- ✓ Full spectrum of activities to conduct clinical trials at all clinical development stages
- ✓ ISO 9001:2008 certified teams and certified ECRIN Data Management Centre
- ✓ Harmonized communication

EUCLID  
EUropean CLinical Trials Platform & Development

[www.euclid-ctu.eu](http://www.euclid-ctu.eu)

## Background

EUCLID, **E**uropean **C**linical Trials Platform & **D**evelopment is an academic F-CRIN-labelled facility, involved in successful collaborations with industry, aiming to support the sponsor/investigator duo in implementing international clinical trials.

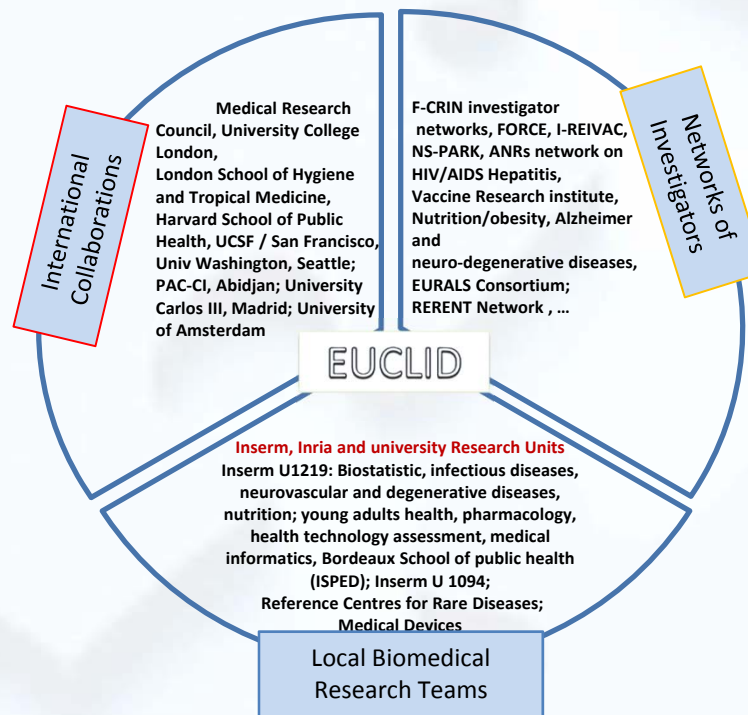

The platform provides **the full range of clinical trial management activities from study design to reporting** to Competent Authorities and dissemination.

EUCLID is based in Southwestern France and unites existing regional resources with clinical research expertise, i.e. INSERM, Hospital (CHUB), Bordeaux University, Bergonié Institute and Limoges University Hospital. EUCLID's expertise, was acquired through over 20 years of successful international experience in competitive research fields. [www.euclid-ctu.eu](http://www.euclid-ctu.eu)

**F-CRIN**, French affiliate of ECRIN, was created to address the national and European challenge to « strengthen the most promising clinical research to Europe ». It is funded by the French government via the « Investissement d'Avenir ». [www.fcrin.org](http://www.fcrin.org)

**ECRIN**, European Clinical research Infrastructure network, is a European infrastructure created to develop European clinical trials. [www.ecrin.org](http://www.ecrin.org)

## EUCLID's Environment for Biomedical Research

## Our Expertise

### Methods

Clinical pharmacology studies from first in man to proof of concept studies  
Phases II, III to mega-trials  
Multiple outcomes, Time-to-event endpoints  
Multivariate normal regression models, Generalised linear modelling  
Medico-economic evaluation  
Pharmacoepidemiology, registries, meta-analysis  
Analysis of multidimensional data

### Topics

Infectious diseases, Immunology Vaccine Research, Neuro-degenerative diseases, geriatrics, Rare diseases, Medical devices, Imaging studies, Nutrition, Cancer, Resource-limited settings

### Trial Management

Site selection and monitoring, project management  
ISO norm certification approach, CIC GCP

### Biobank

Biobank facility (CRB) Bordeaux, Pasteur Institute Lille, CATI, NeuroSpin, Saclay (Neuroimaging); CIC-IT Nancy (Imaging)

### Data Management

ECRIN Data Management Center, eCRF (Clinsight, Macro) and database design (production and set-up), data-validation and cleaning

Multidimensional data – very large databases (ca. 300,000 patients, 10,000,000+ observations), omics data

### Vigilance, Safety

Local department, renowned nationally and internationally

### Subcontracting

Theradis and LC2 (management of IMP), Accelence and Kappa Santé (CROs)

### Dissemination - reporting

Support for grant applications, report writing and co-writing of publications
